

Name : HARISH RAGAVENDRA J

Roll No: 22BCS126

Class: III BSc CS 'B'

PROJECT DESCRIPTION

The Adaptive Multilingual Peer Tutoring Platform eliminates language barriers in education by enabling students to teach and learn from each other in their preferred languages. Using AI-powered text-to-speech (TTS) and real-time translation, it ensures seamless cross-linguistic communication. Built with Python, TensorFlow, and Google Translate API, it is scalable, user-friendly, and adaptable to diverse educational needs. The platform fosters inclusivity, empowering students, educators, and lifelong learners to collaborate globally. It supports various disciplines and proficiency levels, making education accessible to all.
